Mr. Hasan (Malaysia)

# LMS Runtime Environment Conformance Test

1. Importing ADL SCORM Test Course 1  
([successfull](#))
2. Importing ADL SCORM Test Course 2  
([successfull](#))
3. Enroll a student in ADL SCORM Test Course 1  
([successfull](#))
4. Enroll a student in ADL SCORM Test Course 2  
([successfull](#))

# LMS Runtime Environment Conformance Test

## 5. Take the ADL SCORM Test Course 1

### Log File

Beginning mandatory data model element test.

LMSGetValue(cmi.core.\_children) returned:

"student\_id,student\_name,lesson\_location,credit,lesson\_status,entry,score,total\_time,exit,session\_time"

LMSGetValue(cmi.core.student\_id) returned: "200201"

LMSGetValue(cmi.core.student\_name) returned: "Student, Joe"

LMSSetValue(cmi.core.lesson\_location, "end") succeeded

LMSGetValue(cmi.core.lesson\_location) returned: "end"

LMSGetValue(cmi.core.credit) returned: "credit"

LMSGetValue(cmi.core.lesson\_status) returned: "not attempted"

LMSSetValue(cmi.core.lesson\_status, "completed") succeeded

LMSGetValue(cmi.core.lesson\_status) returned: "completed"

LMSGetValue(cmi.core.entry) returned: "ab-initio"

LMSGetValue(cmi.core.score.\_children) returned: "raw"

LMSSetValue(cmi.core.score.raw, "0") succeeded

LMSGetValue(cmi.core.score.raw) returned: "0"

LMSSetValue(cmi.core.session\_time, "00:01:00") succeeded

LMSSetValue(cmi.core.exit, "") succeeded

LMSSetValue(cmi.suspend\_data, "none") succeeded

LMSGetValue(cmi.suspend\_data) returned: "none"

LMSGetValue(cmi.launch\_data) returned: "SCO1LaunchData"

The LMS returned cmi.core.launch\_data equal to the <adlcp:datafromlms> value provided in the Content Package for this SCO.

Content Package <adlcp:datafromlms> value: "SCO1LaunchData"

LMS returned:

# SCO Run-Time Conformance Test & Content Packaging

successful test report

API Support:

Find an LMS provided API Adapter

Execution State:

LMSInitialize()

LMSFinish()

Data Transfer:

LMSGetValue()

LMSSetValue()

LMSCommit

Content Packaging test result is successful
